

PRODUCT PRESENTATION · 2026

Spot & Futures **Engine Licences**

Your keys. Your capital. Our engine.

⚠️ PLEASE READ BEFORE CONTINUING

Important legal notice and risk disclosure

Software, not a financial service

VaultElite is automated execution software licensed for use on your own exchange accounts. It is not an investment, a fund, a managed account, a security or a deposit. VaultElite never holds, receives, pools or transfers user funds.

No advice

Nothing in this presentation is financial, investment, tax or legal advice, or a recommendation to buy, sell or hold any asset. Consider taking advice from an independent, appropriately licensed adviser before making any decision.

High risk of loss

Trading digital assets carries a high risk of loss. Automated execution can accumulate losses quickly, including outside the hours you are monitoring. Risk controls reduce certain risks but cannot eliminate the possibility of loss. You could lose all capital you allocate.

Performance statements

Any performance figure shown is historical and provided for information only. Past performance is not a reliable indicator of future results. Outcomes vary with market conditions, exchange, pairs, allocation, fees and timing. No return is guaranteed, promised or projected.

Futures and leverage

Leverage can result in the rapid loss of all capital allocated to a position. Futures are for experienced traders only and may not be available or lawful for retail clients in some jurisdictions, including the United Kingdom. Futures Licences are coming soon and cannot yet be purchased.

Your responsibility

You are solely responsible for your trading decisions, engine settings, exchange accounts and API keys, and for confirming that use of this software is lawful where you live. It is not available to residents of restricted jurisdictions, including the United States.

Licence parameters such as the Daily Parameter and Licence Cap are software operating limits and licence auto-termination thresholds, not return targets. All licences are governed by the VaultElite Terms & Conditions and Risk Disclaimer at vault-elite.com. VaultElite is a software tool operated by Vault Business LLC. © 2026 Vault Business LLC.

THE MARKET

The market never closes.
People do.

8,760

hours a year the crypto market is open

No closing bell. No weekend. No holiday. Sharp moves arrive at 3 a.m. as readily as 3 p.m. — and nobody can watch all of it.

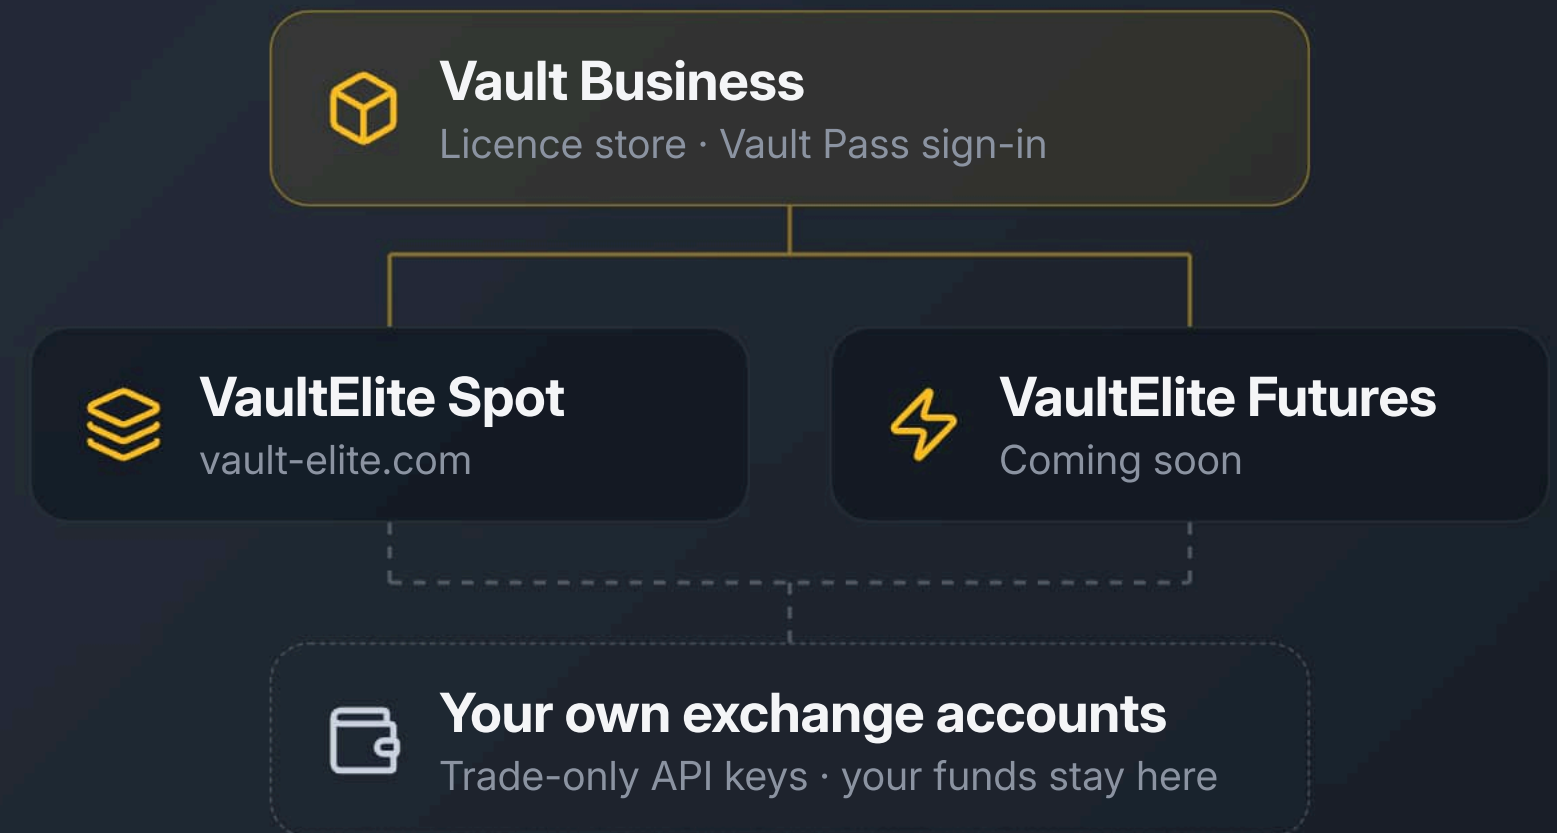

Built for the hours you are not there: fixed rules that run on your own exchange account, watching or not.

WHO WE ARE

The company behind the engine

Vault Business LLC builds and operates **VaultElite** — rule-based execution software for digital-asset markets. Every exchange integration is engineered in-house against the venue's official API.

One account, **Vault Pass**, signs you in to the licence store and to both trading platforms. Your capital stays on your own exchange account throughout.

8

VaultElite is non-custodial

WHY WE ARE DIFFERENT

Built, not assembled

A bot-building platform sells you the parts and leaves the strategy to you. VaultElite licenses the finished engine.

	BUILD-IT-YOURSELF PLATFORMS	VE VaultElite
The strategy	Yours to script or configure, then yours to prove.	✓ Arrives complete. Entries, spacing and exits are engineered and tuned as one system.
When the market runs or falls	Whatever safety logic you thought to build.	✓ Built in. New buys hold off during sharp upward runs, downtrends are defended, and your allocation is a hard ceiling.
Taking profit	Whatever exit you configure.	✓ A trailing exit that arms once a position is in profit, follows the move, and sells when it turns.
When you press stop	Whatever you scripted for it.	✓ No new capital is committed. Positions you still hold keep their exit monitoring until they close.
Your part	Build, test, tune, maintain.	✓ Choose your exchange, pairs and allocation. Start it. Stop it.

The trade-off is real: the algorithm is fixed and cannot be edited by the user. Built-in risk handling reduces certain risks; it cannot eliminate the possibility of loss.

CONTROL AND CUSTODY

Your keys. Your capital. Our engine.

Your exchange account

Your funds stay here, under your own credentials.

Trade-only API key

Withdrawals disabled · revocable by you at any time

The VaultElite engine

Places and manages orders inside the allocation you set.

Orders in

Market data

Nothing else

No custody

VaultElite never holds, receives, pools or transfers user funds.

Trade-only access

The software never requests withdrawal permission and cannot initiate withdrawals.

Hard allocation limit

No order is placed that would push committed capital above your allocation.

Encrypted key vault

Credentials are encrypted at rest with authenticated encryption and isolated per user.

Access is yours to end. Revoke the API key at your exchange at any moment — independently of us.

HOW IT WORKS

Four steps. You stay in control.

01

Purchase a licence

Choose your tier in the Vault Business store. You are buying software access — nothing else.

02

Connect your exchange

Create a trade-only API key on your own exchange account, withdrawals disabled, and connect it.

03

Set your parameters

Choose your pairs, capital allocation and operating settings. Nothing runs until you activate it.

04

Activate, monitor, stop

Start the engine, see every order in your dashboard and on your exchange, and stop it whenever you choose.

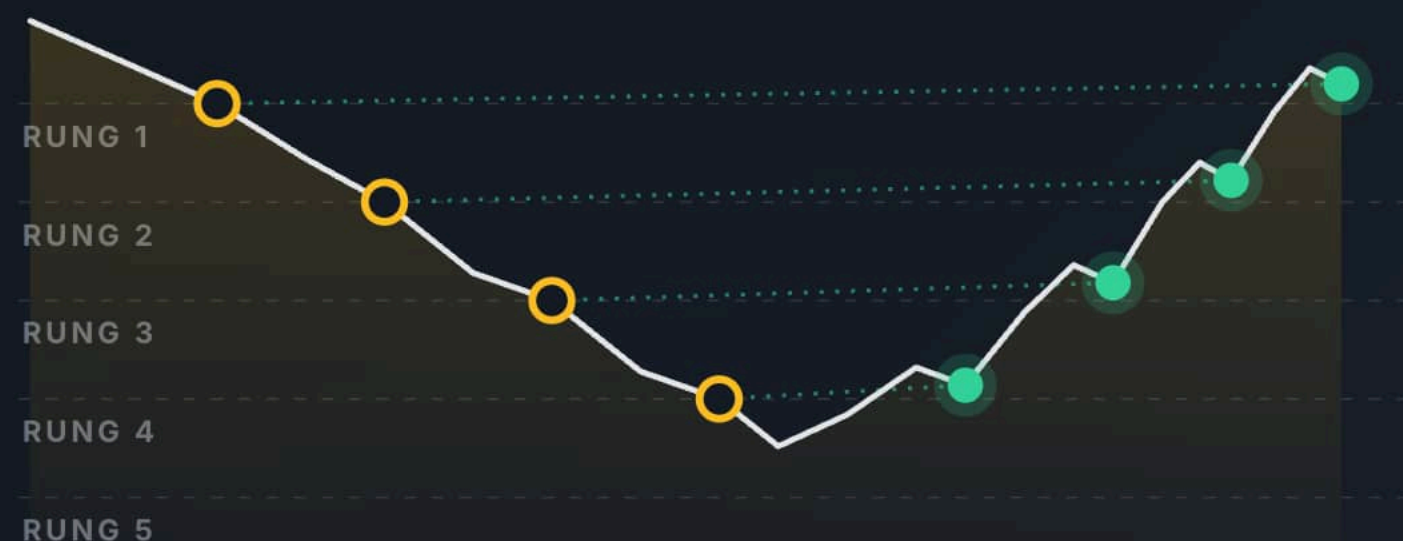

No deposits. No transfers. No handing anything over. VaultElite operates on your existing exchange account through API keys that you create, scope and can revoke at any time.

ENGINE BEHAVIOUR

What the engine does when the market turns

- Each rung that fills is managed and sold as its own lot

- Rung filled
- Lot sold by its trailing exit

Illustrative. Not market data, not a result, and not an indication of future performance. Losses are possible.

Price runs up sharply

With Capital Safety Mode on, new buys hold off rather than loading capital near a short-term peak.

A sustained downtrend sets in

Bear-Cycle Resilience defends capital on the way down and accumulates at confirmed bottoms.

Your allocation is reached

The engine refuses the order. Committed capital cannot pass the ceiling you set.

A position moves into profit

A trailing exit arms, follows the move up and sells when it turns.

You press stop

No further capital is committed. Held positions keep their exit monitoring until they close.

HISTORICAL PERFORMANCE

10–50%

per month

The engine's parameters have achieved gains of **10–50% per month**.

HOW TO READ THIS FIGURE

Historical, not a forecast

Past performance is not a reliable indicator of future results.

Results vary

Market conditions, exchange, pairs, allocation, fees and timing all change the outcome. Losses are possible in any period.

Your capital is at risk

You could lose all capital you allocate. Only use funds you can afford to lose.

Historical figure supplied by Vault Business. No return is guaranteed, promised or projected. VaultElite is licensed software, not an investment product, and does not provide investment advice.

PRODUCT 01

Spot Engine Licences

• Available now

Core · Professional · Elite

RUNS ON YOUR ACCOUNT AT

THE SPOT ENGINE

A finished engine, running on your own exchange account

Rule-based DCA and dynamic grid

Fixed, pre-coded rules. The same market inputs always produce the same actions.

Trailing take-profit

Every filled entry is managed as its own lot and exits on a trailing take-profit.

Capital Safety Mode

Holds off new buys during sharp upward runs.

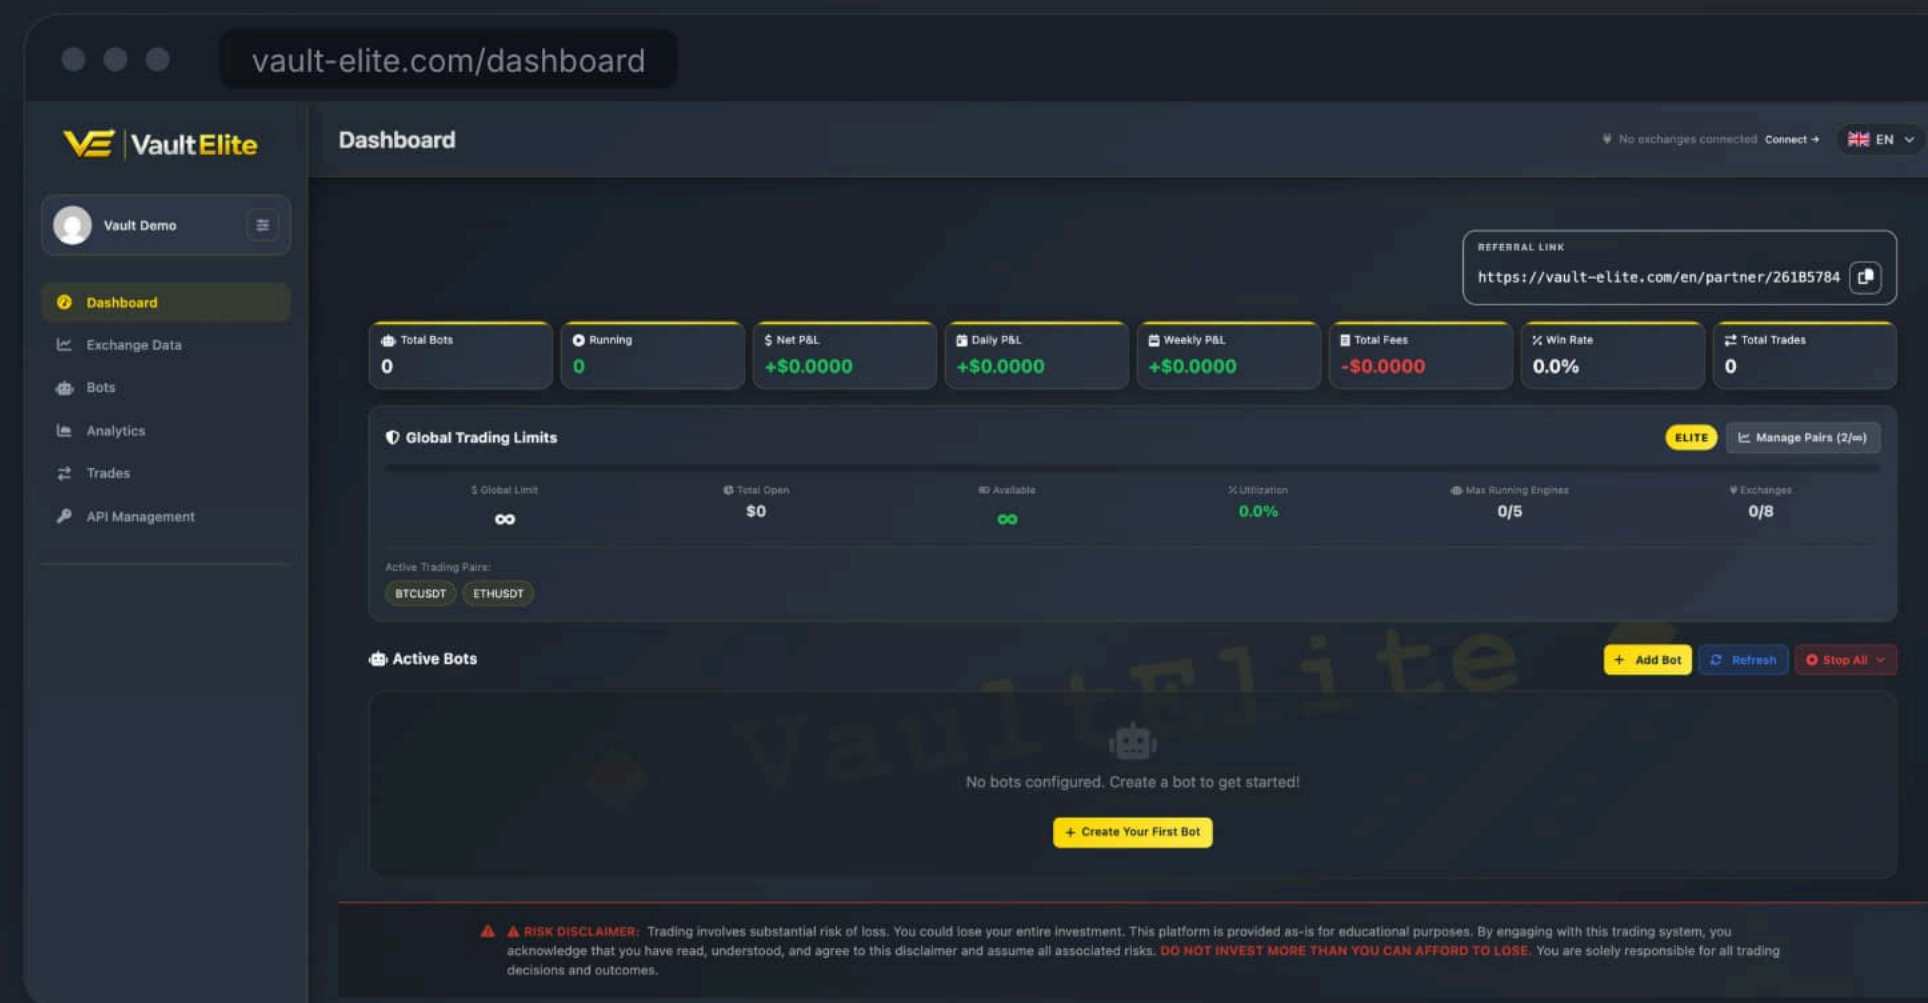

Bear-Cycle Resilience

Downtrend defence at the level you choose: Off, Conservative, Balanced or Aggressive.

Market classification

Five regimes read from volatility, momentum and trend strength. No black box.

The VaultElite spot dashboard — live product, demo account

SUPPORTED TODAY, MORE BEING ADDED

STRATEGY TRANSPARENCY

You set the limits. The engine does the rest.

You control

Set per engine, at creation

- Exchange
- Trading pairs
- Capital allocation
- Order size range
- Grid depth
- Max open trades
- Capital Safety Mode
- Bear-Cycle Resilience
- Start and stop

Fixed by the engine

Not editable on any tier

- Entry placement
- Entry spacing
- Trailing profit capture
- Calibration thresholds
- Reanchoring and regime rules
- Live trading only
- The algorithm itself

Calibration is proprietary: disclosed as behaviour, never published as numbers.

SPOT LICENCE TIERS

One engine. Three ways to scale it.

	Core	Professional	Elite
	For traders automating spot execution with rule-based grid parameters.	For experienced traders at larger scale, across more pairs and engines.	For advanced traders, with no software-imposed allocation or pair limits.
	\$500 USDT	\$3,000 USDT	\$7,500 USDT
Trading pairs	3	12	Unlimited
Capital allocation	\$5,000	\$30,000	Unlimited
Spot engines running	1	3	5
Total bots	1	5	10
Exchanges connected	1	3	8
Licence Cap	\$2,000	\$12,000	\$37,500
Licence term	12 months	12 months	12 months
Priority support and onboarding	—	—	Included

Limits follow the highest tier you hold. For more engines, pairs or capital, choose a higher tier. The Licence Cap is a software limit, not a return target, projection or guarantee.

HOW A SPOT LICENCE RUNS

Two limits. Whichever comes first.

Each spot licence ends at whichever comes first: its Licence Cap or 12 months after activation.

Licence Cap

The licence ends when the net realised P&L on closed spot trades counted against it reaches its cap.

Core **\$2,000**

Professional **\$12,000**

Elite **\$37,500**

OR

12-month term

The licence ends 12 months after it starts running. A licence that is waiting has not started.

The same on every tier

When a licence ends

It cannot be reactivated. A waiting licence starts automatically in its place. If none is waiting, a new licence is needed to continue.

Renewal

Renewing means buying a new licence, at the price shown in the store at the time of purchase. It can be bought in advance and waits its turn.

Visible in the platform

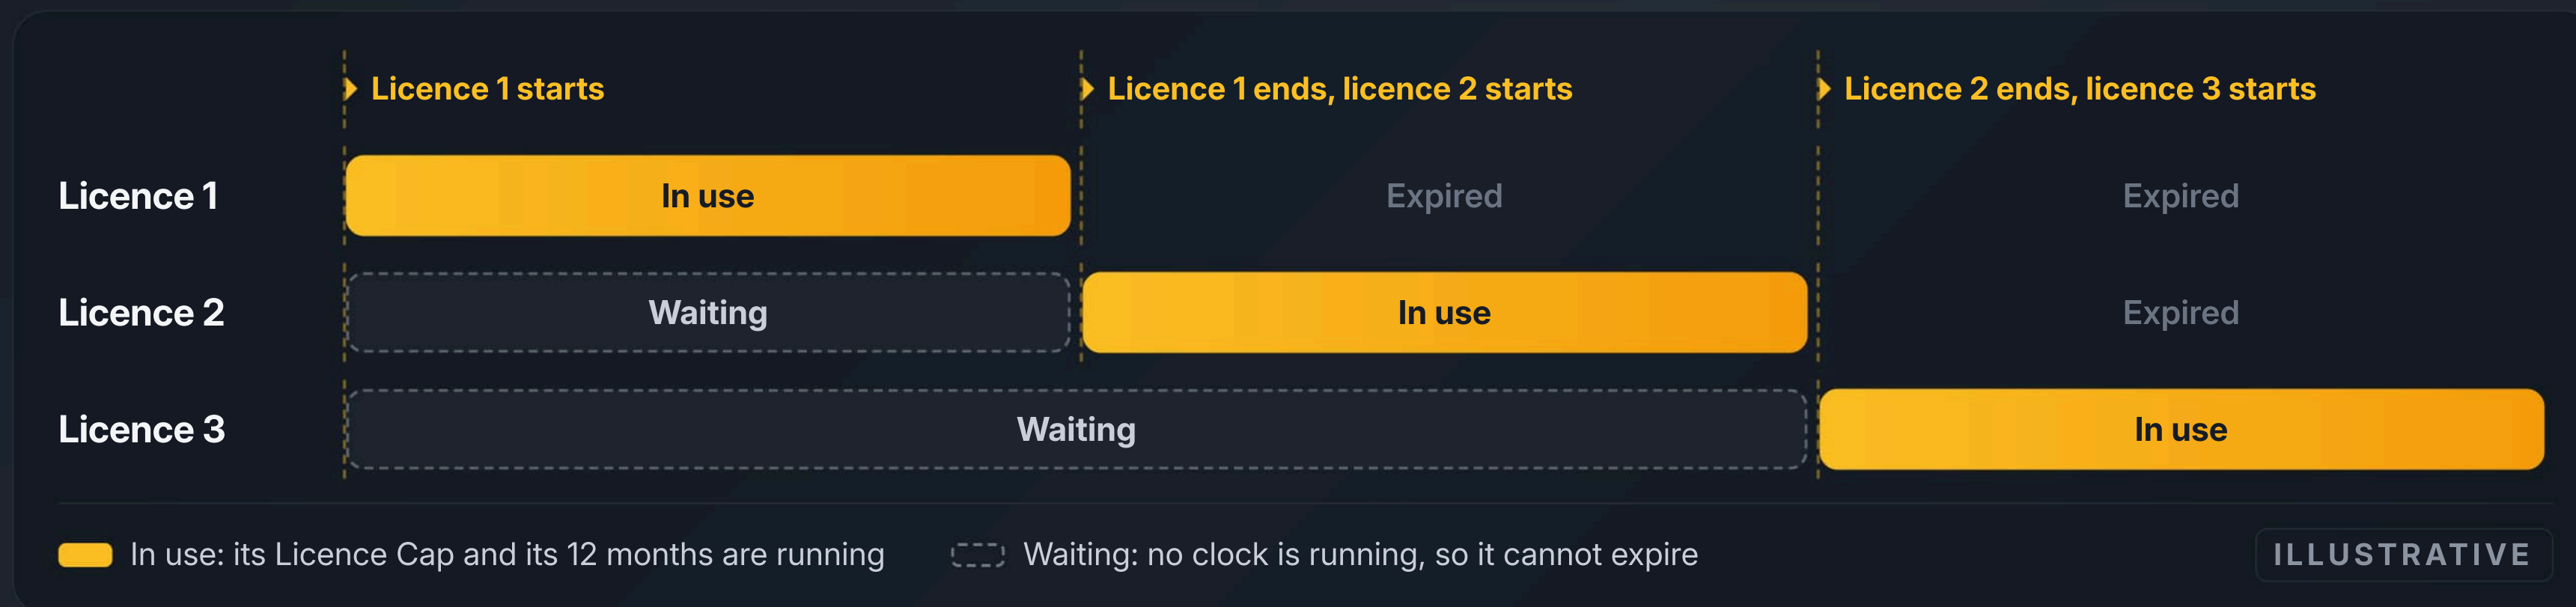

The Spot Licences page shows how much of the Licence Cap has been used and the days left in the term.

The Licence Cap is a software auto-termination limit on the cumulative net realised P&L counted against that licence, not a return target, projection or guarantee.

MORE THAN ONE LICENCE

Licences are used one after another

Used one after another

Licences are used one at a time, in purchase order. A higher tier waiting behind a lower one starts 90 days after it was issued at the latest.

A waiting licence has no clock

It cannot expire while it waits. Its 12 months and its Licence Cap start when it starts being used, not when it is bought.

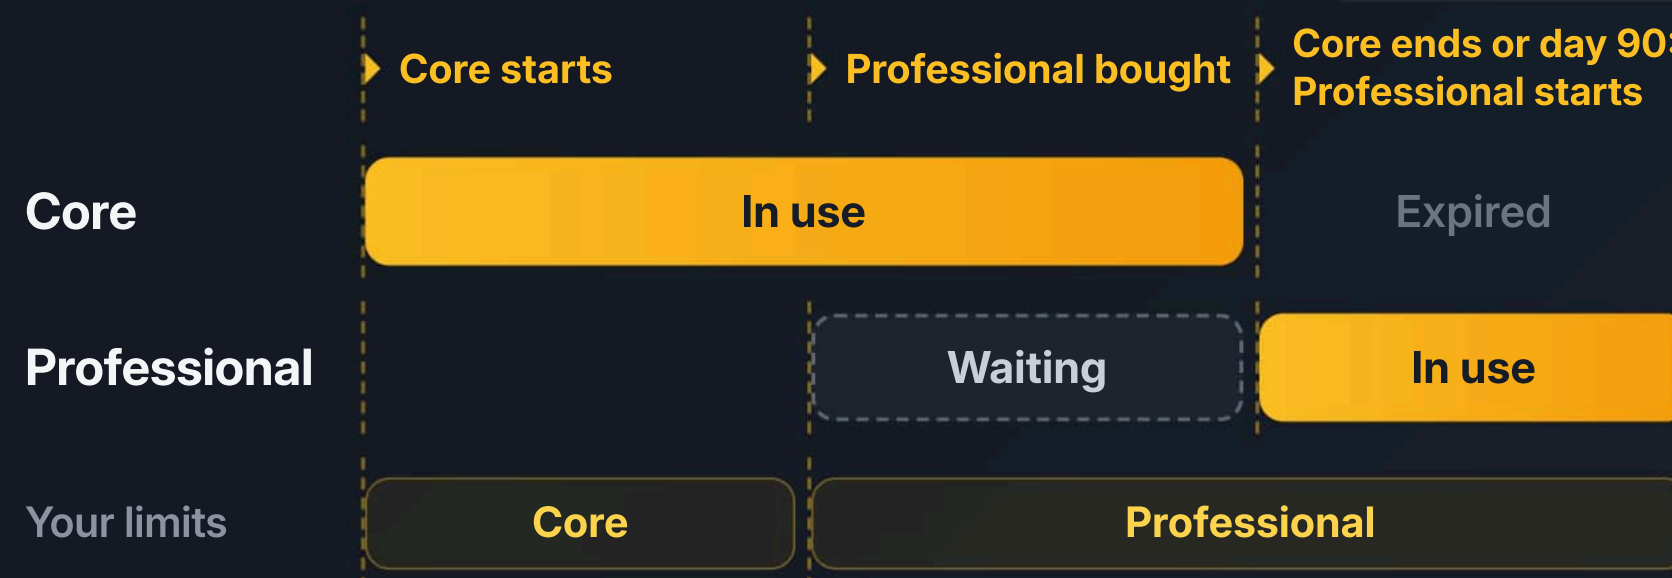

Automatic handover

When the licence in use ends, the next one starts and trading carries on. Positions still open at that moment count against the next licence when they close.

MORE CAPACITY

More capacity is a higher tier

ILLUSTRATIVE

Your limits rise when the higher tier is bought. Its 12 months and its Licence Cap start when the licence ahead of it ends, or 90 days after it was issued at the latest. If day 90 comes first, both licences run and P&L still counts against the older one first.

Limits follow the highest tier you hold

Your engines, trading pairs, exchanges and trading capital are those of the highest tier among your licences that have not ended, in use or waiting. They are not added together.

An upgrade raises your limits at once

A higher tier raises your limits as soon as payment is confirmed. It then waits its turn: its 12 months and its Licence Cap start when the licence ahead of it ends, or 90 days after it was issued at the latest.

Only the last licence can pass its cap

Net realised P&L counts against the older licence first. Only your last licence can finish above its Licence Cap, and only by the P&L on positions that were already open when the cap was reached.

When no licence is left

The engines open no new positions and keep managing the positions they hold until those close. A new licence restores trading.

PRODUCT 02

Futures Engine Licences

• Coming soon

Eight tiers · Prestige to Apex

CENTRALISED AND ON-CHAIN VENUES

Binance

MEXC

KuCoin

BingX

Bitget

OKX

HTX

Bybit

Hyperliquid

AsterDex

COMING SOON

Perpetual futures, on the venues you already use

One licence, two execution products

Signal execution and futures trading bots run under the same licence, with one pooled Licence Cap.

Centralised and on-chain

Eight centralised futures venues, plus Hyperliquid and AsterDex on-chain.

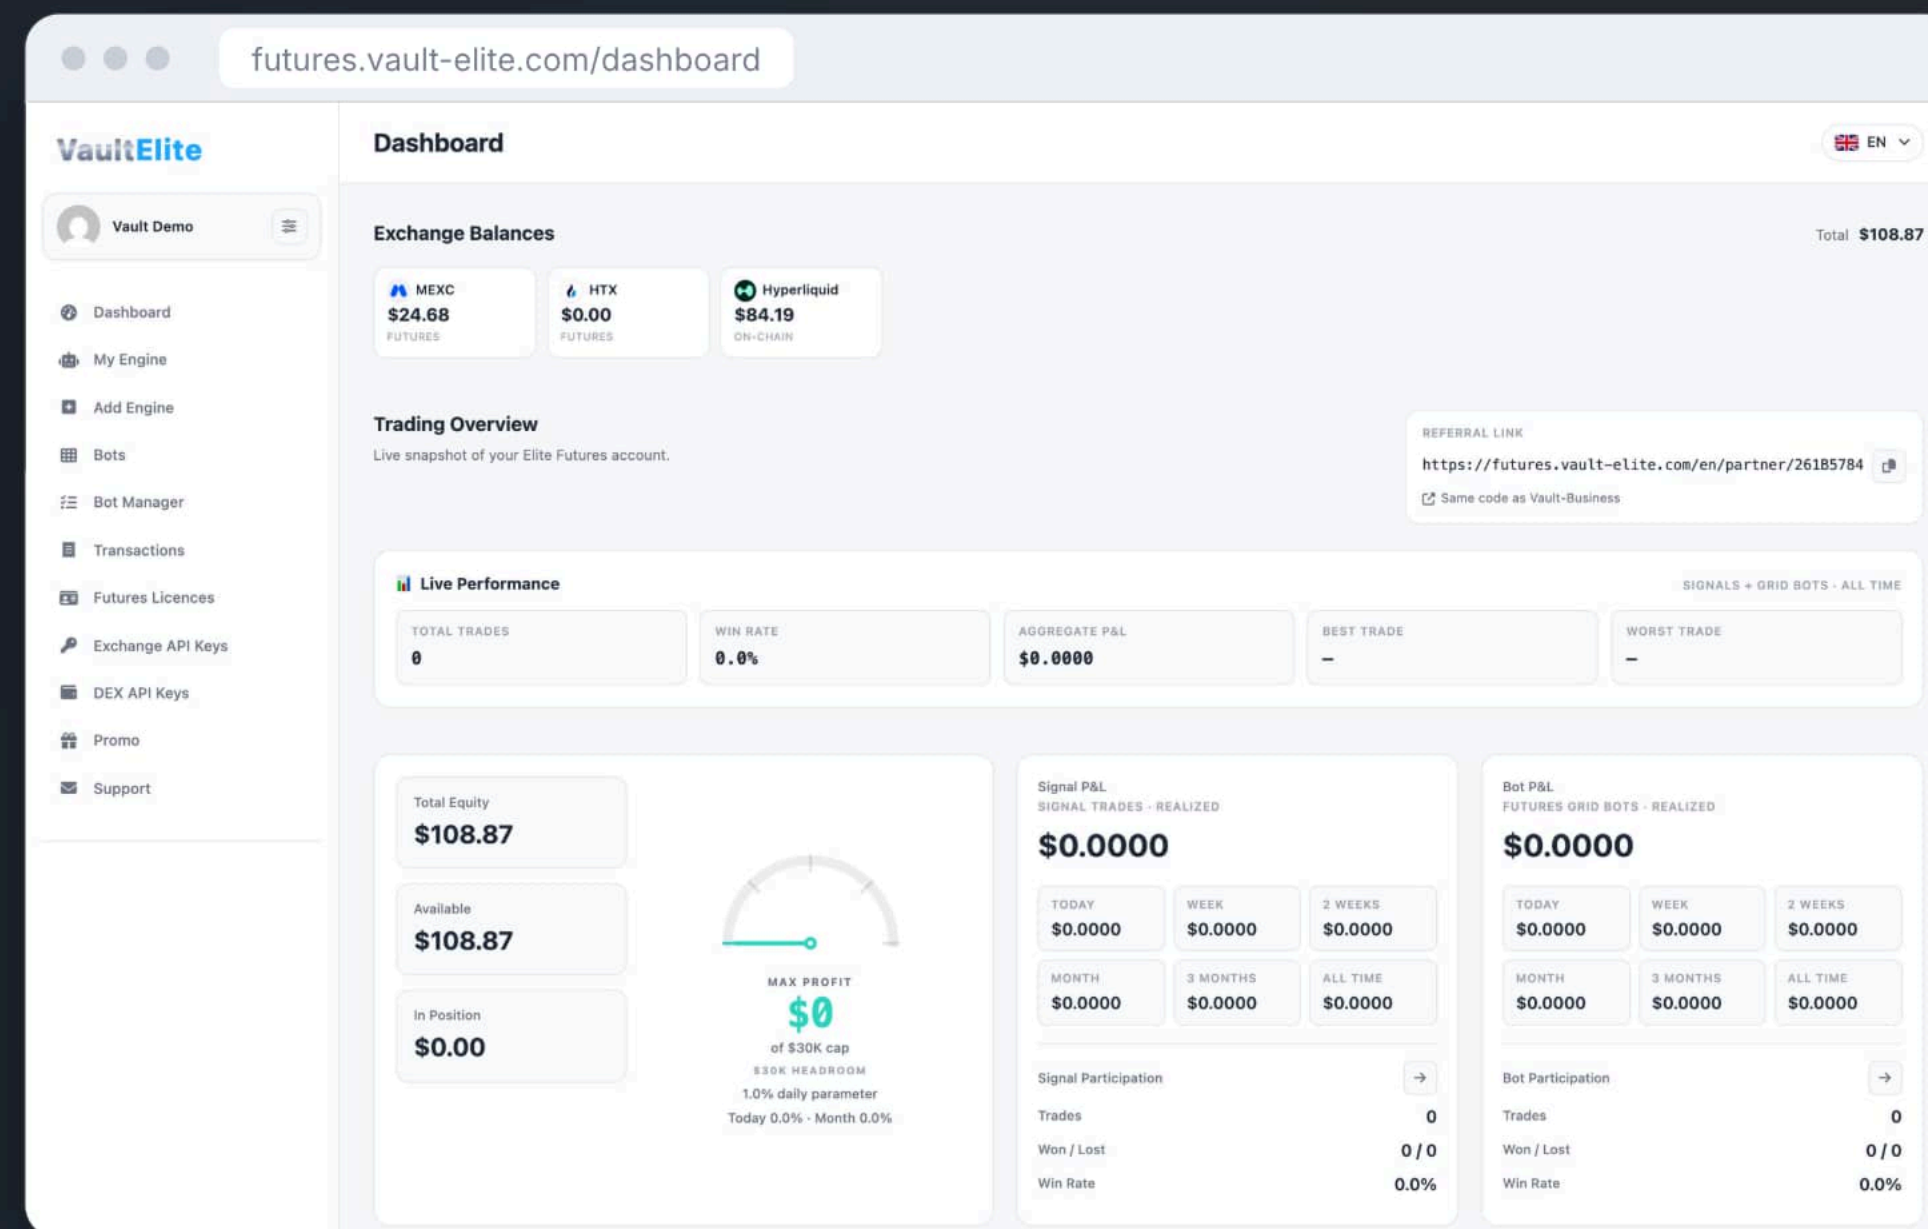

No calendar expiry

A licence ends only when cumulative realised PnL reaches its Licence Cap. Licences are stackable and renewable.

Built-in guards

Liquidation-buffer logic and circuit breakers are software functions of the engine.

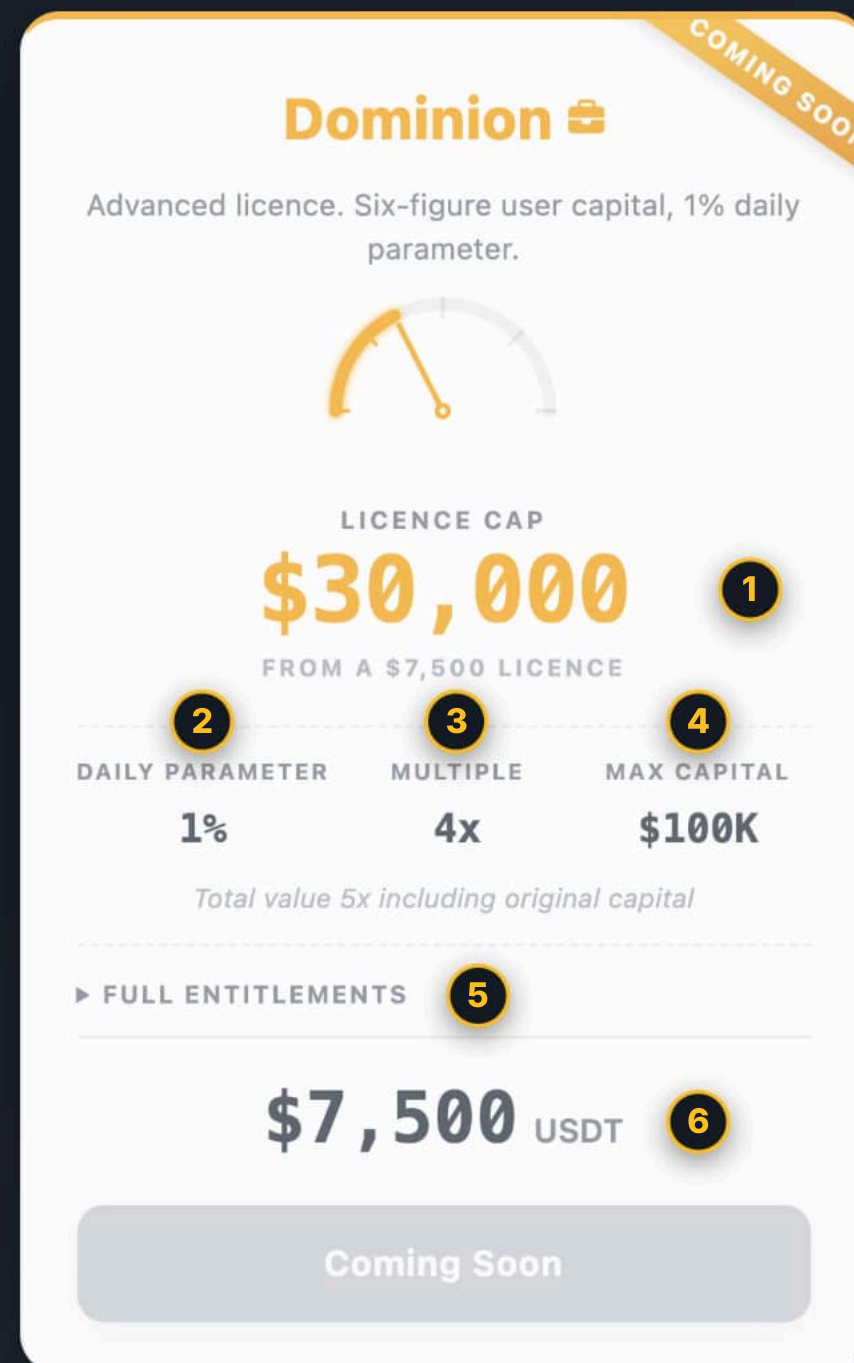

The VaultElite Futures dashboard — live product, demo account

Leverage magnifies losses as well as gains and can result in the rapid loss of all capital allocated to a position. For experienced traders only.

READING A LICENCE

Anatomy of a futures licence

- 1 Licence Cap**
The licence terminates automatically when cumulative realised PnL on your connected account reaches this figure. There is no calendar expiry.
- 2 Daily Parameter**
The tier's daily operating parameter for the engine. A software setting — not a return target or projection.
- 3 Multiple**
The Licence Cap expressed as a multiple of the licence price.
- 4 Max Capital**
The maximum connected capital the licence covers. This stacks across licences.
- 5 Full entitlements**
Running bots, total bots, trade engines, pairs, maximum leverage and venues for the tier.
- 6 Price**
The licence price, in USDT.

FUTURES LICENCE TIERS

Eight tiers, from Prestige to Apex

TIER	PRICE (USDT)	LICENCE CAP	DAILY PARAMETER	MULTIPLE	MAX CAPITAL	RUNNING BOTS	TRADE ENGINES	PAIRS	MAX LEVERAGE	VENUES
◆ Prestige	\$500	\$1,750	0.1%	3.5×	\$5K	1	1	3	5×	1
◆ Opulence	\$2,500	\$9,000	0.5%	3.6×	\$25K	2	2	6	10×	2
◆ Dominion	\$7,500	\$30,000	1%	4×	\$100K	3	3	10	20×	3
◆ Sovereign	\$21,000	\$94,500	2%	4.5×	\$500K	5	4	15	25×	5
◆ Imperial	\$50,000	\$250,000	3%	5×	\$2M	8	6	25	50×	8
◆ Dynasty	\$100,000	\$600,000	4%	6×	\$10M	12	8	40	75×	12
◆ Titan	\$250,000	\$2,000,000	5%	8×	Unlimited	20	12	Unlimited	100×	Unlimited
◆ Apex	\$1,000,000+	Negotiated	10%	10×	Unlimited	Unlimited	Unlimited	Unlimited	125×	Unlimited

Entitlement counts come from your single highest-ranked active licence and do not add together; Licence Caps and maximum connected capital stack. All figures are software operating parameters and licence auto-termination thresholds, not return targets or profit projections. Apex is by invitation.

THE LICENCE LINE-UP

Spot licences

Core · Professional · Elite

\$500 USDT

Core

For traders automating spot execution with mechanical, rule-based grid parameters.

- ✓ Max 3 Trading Pairs
- ✓ Max Capital \$5,000
- ✓ **Licence Cap \$2,000**
- ✓ **12-Month Licence Term**
- ✓ 1 × Spot Engine
- ✓ Connect 1 Spot CEX (8 supported, more being added)
- ✓ Detailed Trade & Activity Dashboards
- ✓ 24/7 Server Infrastructure

\$3,000 USDT

Professional

For experienced traders automating spot execution at larger scale, across more pairs and engines.

- ✓ Max 12 Trading Pairs
- ✓ Max Capital \$30,000
- ✓ **Licence Cap \$12,000**
- ✓ **12-Month Licence Term**
- ✓ 3 × Spot Engines
- ✓ Connect 3 Spot CEX (8 supported, more being added)
- ✓ Detailed Trade & Activity Dashboards
- ✓ 24/7 Server Infrastructure

\$7,500 USDT

Elite

For advanced traders operating at scale, with no software-imposed allocation or pair limits.

- ✓ Unlimited Trading Pairs
- ✓ Unlimited Capital Allocation
- ✓ **Licence Cap \$37,500**
- ✓ **12-Month Licence Term**
- ✓ 5 × Spot Engines
- ✓ Connect 8 Spot CEX (8 supported, more being added)
- ✓ Detailed Trade & Activity Dashboards
- ✓ Priority Support & Onboarding

Each spot licence ends at whichever comes first: its Licence Cap or 12 months after activation. The Licence Cap is a software auto-termination limit on the cumulative net realised P&L counted against that licence, not a return target, projection or guarantee.

PAYMENT

Accepted currencies

Vault Business accepts these cryptocurrencies for licence purchases.

 USDT Tether NETWORK  Tron (TRC-20)	 BTC Bitcoin NETWORK Bitcoin	 SOL Solana NETWORK Solana	 USDC USD Coin NETWORK  Ethereum (ERC-20)	 USDT Tether NETWORK  Ethereum (ERC-20)
--	---	--	--	--

Paid at the Vault Business checkout

Every licence purchase is paid in the Vault Business checkout, also when you start it from inside VaultElite.

Shown at checkout

The payment options shown at checkout are the ones available at that time.

The network must match

Send the exact asset shown at checkout, on the network shown, to the payment address displayed. Assets sent on the wrong network or to the wrong address may be unrecoverable.

Blockchain network fees are paid by the sender. Coin names and logos belong to their respective projects.

IN SUMMARY

Why VaultElite

A finished engine

Entries, spacing and exits arrive engineered and tuned as one system. Nothing to script.

Non-custodial by design

Your capital stays on your own exchange account. The software cannot move funds off it.

A hard capital ceiling

Your allocation is enforced at order level, before any order reaches the exchange.

Rules for rough markets

Capital Safety Mode and Bear-Cycle Resilience are built in, not bolted on.

Native exchange connectors

Each integration is built against the venue's official API — no third-party trading libraries.

Verifiable activity

Every order is visible in your dashboard and on your own exchange account.

The engine is built. The keys stay yours.

Built for experienced, hands-on traders who want systematic, rule-based execution on their own accounts.
